

Sample Articles for Pre-Reading

As noted in the invitation for this session, the session will include a practical exercise with two sample articles. From past experience, we find that participants gain more from the session when they have had a chance to review the sample articles, so we'd appreciate you taking the time to review the following two articles:

1. sample clinical practice guideline:

Click on PDF/Print below the author information if you would like to print.
2. sample systematic review:

Click on Article as PDF in the right-hand column if you would like to print.

Don't worry if you're not an expert on restless leg syndrome or pharmacists' scope of practice. The concepts are more important than the content. We'll teach a basic framework that will help you ask the right questions when you apply it to your area of expertise.

Please print your own article if you wish, or have it available on an electronic device.

Thank you,
Sarah Jennings & Michelle Gibbens
